

# Line 21 Replacement

Fort Simpson, North West Territories

## Client

Michels Canada

## Contract Value

\$11,000,000.00

## Duration

8 months

## Services Provided

- Access Matting
- Construction Equipment
- Logistics/Transportation

## Client's Needs

The primary objective was to replace an aging section of pipe under a river with *zero disturbance to the surrounding natural environment*. Access mats were required for an 11 kilometer stretch of remote access, along with 2 drilling pads and an area to set up a remote camp.

## Challenges

All materials and equipment required had to be delivered in the winter utilizing local ice bridges and roads. Once the River was flowing in the spring, a portion of the matting had to be transported up river by barge to the remote site.

## Project Highlights

212 truck loads carrying 17,500 access mats to Fort Simpson in the span of just 21 days.
